

# STEM Students Score Music

Endless Mountain Music Festival (EMMF), Science & Discovery Center (SDC), and regional school districts are collaborating to develop a Junior Composer Program for students in Elementary, Middle/Jr. High School, High School, and College. The mission of EMMF and SDC is to combine STEM elements with music by using technology to guide students to score their own inspired compositions. Students will receive master class mentoring from eight Hollywood Composers who will be performing eight world premieres at the 2021 Endless Mountain Music Festival.

Workshop Help Sessions details:
